Actual size

Sony Lavalier Microphones

Sony is a leading provider of professional lavalier microphones.

The ECM-50, Sony's first lavalier microphone released in 1969, was an epoch-making product that achieved a perfect balance between compact size and excellent performance. The ECM-50 led on to the development of the broadcast-standard ECM-30, a smaller and less expensive lavalier released a few years later.

More than four decades on, Sony is still one of the leaders in the lavalier microphone market with nine models and 21 variations, including the ECM-55 which is the successor of the legendary ECM-50, and the ECM-44 which is the successor of the ECM-30.

Sony's ECM-88 is a series of ultra-miniature, omni-directional lavalier microphones, whose performance is highly acclaimed within broadcast, production, and theatrical circles. The ECM-77 is also very well regarded, especially by broadcasters. The ECM-66 is another top-of-the-line model with uni-directional directivity, which provides good isolation and resistance to feedback.

Sony is also a leading provider of the digital wireless microphone system*1. Recently, the ECM-66, ECM-55, and ECM-44 series have been qualified for use with digital wireless by enhancing the capsule shielding to reduce radio frequency interference susceptibility, as well as the ECM-77 series*2. In addition to superb sound quality, digital transmission offers various advantages such as stable transmission and a more flexible channel plan.

The lavalier microphones from Sony make an ideal choice for virtually all quality-conscious sound-gathering applications, such as public address, ENG/EFP, studio, theater, and use with musical instruments.

*1 The digital wireless microphone system is not available in some countries.

*2 Digital wireless system requires use of the /9X version lavalier microphones. The ECM-77, ECM-66, ECM-55, and ECM-44 series have already been switched to the /9X version.

VARIATION OF THE INTERFACE

B type *3	BC type	BMP type					
<p>Supplied with an in-line battery unit, or a DC-78 DC power supply unit. Two-way powering possible - internal AA-size (LR6) alkaline-battery operation or external DC (12 to 48 V) operation.</p>  <p style="text-align: right;">B</p>	<p>Supplied with a Sony 4-pin connector (SMC9-4P), for use with the WRT-8B/822A/822B, UHF-synthesized transmitter, or DWT-B01 bodypack transmitter.</p>  <p style="text-align: right;">BC</p>	<p>Supplied with a 3-pole locking mini plug for use with the bodypack transmitter included in the UWP series.</p>  <p style="text-align: right;">BMP</p>					
<p>BPT type *4 *5</p> <p>Supplied without a connector (pigtail), enabling users to choose connectors according to their transmitter.</p>  <p style="text-align: right;">BPT</p>	<p>FPT type</p> <p>Beige-colored model supplied without a connector (pigtail), enabling users to choose connectors according to their transmitter.</p>  <p style="text-align: right;">FPT</p>	<p>Note: /9X version shown (bottom microphone image in each box) includes a different color strain relief at the top of the connector.</p> <p>Legend:</p> <table border="1" data-bbox="1036 1745 1446 1780"> <tr> <td>B</td> <td>BC</td> <td>BMP</td> <td>BPT</td> <td>FPT</td> </tr> </table> <p>Type of applicable interface.</p> <p>/9X</p> <p>Digital wireless model</p>	B	BC	BMP	BPT	FPT
B	BC	BMP	BPT	FPT			

*3 ECM-44B does not support external DC operation.

*4 There is no difference in appearance between the conventional BPT type and "/9X" BPT type.

*5 Radio-frequency interference from the digital wireless system may occur if the self-prepared connector has not been grounded sufficiently.

Product Description

ECM-88 series

B	BC	BMP	BPT	FPT
---	----	-----	-----	-----

FEATURES

- Ultra-miniature, omni-directional electret condenser microphone.
- Designed for quality-critical applications in broadcasting, theater, and field productions.
- Choice of model variations to suit specific user requirements.
- Flat-and-wide frequency response provides natural sound reproduction.
- Water-resistant design maintains sound clarity in almost any application or environment.
- Dual-diaphragm mechanism contributes to high sensitivity, wide dynamic range, and low noise.
- Low cable-noise characteristics.
- Miniature design makes it easy to conceal in a stage costume.

Directivity Characteristics

Frequency Response Characteristics

ECM-77 series

/9X

B	BC	BMP	BPT	FPT
---	----	-----	-----	-----

FEATURES

- Miniature, omni-directional electret condenser microphone.
- Performance and reliability in studio, ENG, and EFP applications.
- Choice of model variations to suit specific user requirements.
- Wide frequency response, high sensitivity, and low-noise characteristics.
- Miniature design makes it easy to conceal.
- Ideal for use with DWT-B01.

Directivity Characteristics

Frequency Response Characteristics

ECM-66 series

/9X

B	BC	BMP	BPT	FPT
---	----	-----	-----	-----

FEATURES

- Uni-directional, electret condenser microphone.
- Resistant to howling by rejecting indirect sound.
- Ideal for institutional use and sound-contracting applications such as speeches, lectures, and conferences.
- Designed for a wide range of applications from voice to instrumental recording.
- Wide dynamic range (101 dB), and high maximum input-sound-pressure level (130 dB SPL).
- Low inherent-noise characteristics.

Frequency Response Characteristics

Product Description

ECM-55 series

/9X

B BC BMP BPT FPT

FEATURES

- Omni-directional, electret condenser microphone.
- High signal-to-noise ratio and low inherent-noise characteristics.
- Large microphone head of 10.6 mm (7/16 inch) diameter offers rich sound reproduction.
- Successor to the ECM-50 microphone, the world's first electret condenser lavalier microphone.

Directivity Characteristics

Frequency Response Characteristics

ECM-44 series

/9X

B BC BMP BPT FPT

FEATURES

- Omni-directional, electret condenser microphone.
- Choice of model variations to suit specific user requirements.
- Cost-effective miniature microphone provides superb sound quality.

ECM-44B does not support external DC operation.

Directivity Characteristics

Frequency Response Characteristics

ECM-166 series

B **BC** BMP BPT FPT

FEATURES

- Uni-directional, electret condenser microphone.
- Resistant to howling by rejecting indirect sound.
- Reasonably priced lavalier microphone, ideal for institutional use and sound-contracting applications such as speeches, lectures, and conferences.

ECM-V1BMP

B BC **BMP** BPT FPT

FEATURES

- The lavalier microphone supplied with the UWP package is available as an individual microphone.
- Omni-directional, electret condenser microphone.
- Reasonably priced lavalier microphone, ideal for ENG and EFP uses.

Directivity Characteristics

Frequency Response Characteristics

* The characteristics are measured as UTX-B2V.

ECM-X7BMP

B BC **BMP** BPT FPT

FEATURES

- The lavalier microphone supplied with the UWP package is available as an individual microphone.
- Uni-directional, electret condenser microphone.
- Resistant to howling by rejecting indirect sound.
- Reasonably priced lavalier microphone, ideal for institutional use and sound-contracting applications such as speeches, lectures, and conferences.

Directivity Characteristics

Frequency Response Characteristics

* The characteristics are measured as UTX-B2X.

ECM-322 series

B **BC** **BMP** BPT FPT

FEATURES

- Omni-directional, electret condenser microphone.
- Headset microphone, ideal for a variety of multimedia presentation applications ranging from seminars and conferences to lectures and workshops.
- Ear-clip-style design, wearable on either the left or right ear.
- The position of the microphone is adjustable.
- With the adjustable soft-texture ear hook and detachable headband, the headset microphone is comfortable to wear and fits stably on the ear, even during lengthy presentations.

SPECIFICATIONS

		ECM-88 Series	ECM-77 Series	ECM-66 Series	ECM-55 Series
